

## Episode 4

### Stage

Dragon galaxy

### Story

The Earth battleships are inside the dragon galaxy, and discover the vast space in the middle is the space for naught. The headquarter of ancient aliens may be once around this area. Now, innumerable fix star systems extinct.

There emerges the big Salene squadron, and the battle begins. Yamato fights back but the Earth federation loses the battle and Yamato is in danger by being chased by the Reykyard's fleet.

Then, both Yamato and Reykyard's ship are fallen into the dimensional dislocation and from the information remained behind, they get to know the mysterious explosion of the ancient alien's base star. This is the reason for existence of the huge naught space in the dragon galaxy. From the disastrous remains, Nabu and his group discover something like a sea chart or mavogatopm map of the ancient aliens. By this, ancient aliens travelled dimensional canals, and they cultivated the culture of navigation around the space. The sea chart indicates their base is not actually at Dragon galaxy, but at the M33 galaxy which is two point five million (2,500,000) light years ahead. And "Rank 10" monopole exists at the same place.

Yamato after her much efforts to escape from the dimensional dislocation

goes to M33 galaxy. Naturally, Salene fleet chase after her.

### Salene Side

Rekyard, unlike Salene mentality, has an Earth characteristic nature to sympathize with the weak, and he is critical of emperor Brone who took advantage of the cease fire occasion as the preparation for the next war. Also, he does not feel comfortable about the fact that Amesis promotes him from her personal favor towards him. Yet, he is faithful and capable soldier for Emperor and the Salene. He becomes the strongest foe to Yamato.

### The Earth Side

During 17-year cease fire period, the Salene has cultivated the knowledge of utilizing monopole. The 100-year-war was well-matched, but this time, the winning chances are against the Earth at various areas.

## Battle Ideas

Salene fleet led by Rekyard and the Earth federation army including Yamato. Battle Stage---settings of weapons of Salene fleet.

### Climax

Disastrous explosion inside the Dragon galaxy.

Devastating condition of dimensional dislocation and the condition of the remains which indicates the destiny of the ancient aliens.

### Necessary Ideas

Settings of Dragon galaxy

Settings of dimensional dislocation

The navigation chart to indicate the vast inhabitation of ancient aliens and M33 galaxy as their home base.

## Points of questions

One of the characteristics of "Yamato" is the fantastic and romantic element of the appearance of a space beauty (like Stasha) in the story, but at the present stage, "New Yamato" does not contain such elements (At first, Mercy could be such an element, but the idea was deferred.)

How about this idea?

In the destructed space in the dragon galaxy, there remains an echoing thought of ancient aliens. They speak to the visitors only whom they like. These conversation is conveyed to the brain like telepathy. But since it doesn't have much impact on visual scene, the voice takes the form of the person of imperial position, and it speaks as such a virtual images. To Yamato, it could be the form of Mercy or of some other mysterious beauties.

In this way, at the remains, you do not have to read the explanatory words about the ancient incidents. The image characters (Nabu and Others) like it, and it can explain, warn, and guide them. It can float, stand and its size can be changed freely. We can use it in the later episodes.

This is only an example, but we like to consider how to flavor its fantastic and romantic elements.

※ However, how to actually draw it is in question.  
We need the visual idea of Mr. Mead.

## Episode 5 (could be into two parts)

### Place

Salene Main Star and its surroundings.

### Story

To reach at M33 (2.5 million light years ahead), it needs a super jump by using various dimentional canals to reach there in a shorter time. It happens to be that the exit of one canal and the entrance of next one are both

located near Salene's main star. Without those passages, we cannot reach at M33 galaxy.

Emperor Brone gets aware of this and embarks on the full attack at the Earth federation fleet including Yamato with their full force. Yamato fights back and almost completely destroys the Salene fleet. Then, emperor Brone plays his best card. There in front is floating a gigantic area as a huge battleship including Brone's palace ship (just like floating a larger area than Manhattan in NY).

Emperor Brone wins against Yamato and heads his huge battleship to M33 galaxy.

Shima is seriously injured during this battle.

Dying Shima tells the following stories to Nabu and passes away.

- (1) I was the 17th Yamato Captain whose ship was crashed into Rinbus Star.
- (2) Yamato, the mother ship of the Earth federation space fleet, went to Rococo Star with the special mission.  
It was supposed to bring back to the Earth an important information on the space egg - M10 excavated in the ancient alien's remains.
- (3) Just before her take-off, the Salene's fleet attacked her. Yamato mission on the space egg, M10 was thought to have been leaked out. The defense army at Rococo were completely destroyed, and I tried to get as many Earth people on board as possible. At the time, a female scientist trusted me with her newly born baby. She was lost then after she left to find her missing husband who was also a scientist.
- (4) Yamato left Rococo, but her main engine was damaged and completely destroyed near the Rinbus star. I ordered everybody to leave the ship with life boats. I, as Captain, remained in the ship, but in front of me, all the life boats were destroyed by the enemy's missiles.

Then, in Yamato another person remained there who was a seriously injured archeologist. He held a newly born baby boy in his arms. I myself carried a baby girl trusted with me at Rococo.

Then, to execute the mission to save three lives and to bring back the information on the space egg M-10, we left the crashing Yamato with the escape pod. Soon after Yamato crashed into Rinbus.

- (5) We were rescued by the immigrant family from the Earth living at a city. Not to be found by Salene's army, I trusted the injured scientist and the boy with this immigrant family. I myself lived a hidden life with the baby girl. This boy is Nabu, and the girl Mercy.
- (6) Right after Yamato's crash into Rinbus, there came the cease fire. Rinbus was completely blockaded by the Salene, and I could not either bring back the information on the space egg M10 nor communicate with the Earth army. All I could do was wait and see, disguising myself as a scrap dealer.
- (7) Nabu's father, the injured scientist could not be saved. The immigrant family who raised Nabu also died without seeing Nabu as manhood.
- (8) The Earth federation name the strongest ship at each time as "Yamato." The 17th Yamato active as the space mother battleship of the federation was lost in the middle of her real mission. Yet, according to Nabu's father, a scientist, the information on the space egg M10 found in the Rococo remains was something with a power to end this war.

#### Salene Side

Emperor Brone is now busy in restarting another 100-year-war against the Earth federation and has the ambition to conquer the universe by enlarging his war strategies. He denies the notion of mortality of human life. He believes that our life could be eternal by the clone technics, and in a same way, Brone's conquer of the universe eternally makes his territories expand. For the ace of trumps, he now moves his last card to get the space egg, M-10.

Packerd who is a clever small villain dies in the battle with Yamato in Episode 2, but he turns into a cyborg and reappears as a giantic villain.

#### Earth Side

The 100-year war which stopped 17 years ago restarted. In order to stop

this miserable war, the old Yamato was built. This episode contains such Yamato mission is passed from Shima to Nabu.

Points of questions and necessary ideas

- ※ Mechanism of Salene's main star in the battle of Salene main star.
- ※ Defense system of Salene's main star
- ※ Emergence of castle-space ship — war strategy — weapon setting
- ※ Dimensional hole(?) navigation based on the ancient alien's sea chart.

Shima's story is abundant, so it could be divided into 2 stories. Also, in his story, he describes the way Yamato crashes into Rinbus, but it is a usual crash. It is strange that Salene army loses the sight of Yamato, and strange is the way it is hidden (buried) in a mountain. How about this idea? Shima takes the last chance to save three civilian lives in the ship and to bring back the data; that is, execute the time warp. However, the damaged mechanism could not reach her to the apparition point, and she emerged in the mountainside of Rinbus.

## The Basic Concept. (Episode 6)

The location.

M33 galaxy. The sealed remains of the ancient alien. And others.

The story.

Yamato is heading for M33 galaxy.

Losing Shima, Major Schmidt is taking after Shima's role. Nabu holds the disapprovals of the boys and supports the Schmidt's taking up the post.

If to own the Space egg M-10 is the way to suppress the riots of Emperor Brone and Salene, and to come to the real end of 100 years war, he has to have it by all means. Nabu's position is becoming noted and he is promoted to the more responsible position.

Nabu and boys are now trying to read the deta in the blackbox left by Shima, but the box is tightly sealed and unable to open.

The ancient aliens are the living creature existed in the era when the space is still hot after 10,000 years of the big bang. (This situation is still under consideration. Now tentatively written here.) As the space is getting cold, the aliens lose their ability to adjust themselves to the climate and try to recover the environmental heat by monopole power but they soon know the limitation and leave the place to the unknown active galaxy.

At the time, the ancient alien left the message, "To own it, could control the universe", as if they exhibit their existence and power. It refers to the spaceegg M10 which they sealed in one corner of M33 galaxy.

The place of sealing is in a white dwarf. (This also is under consideration) The white dwarf means the aged sun which loses the light. Its size is only ten kilometers in diameter but it has the some hundreds times bigger massive power and tremendous gravity. The ancient aliens put the space egg M10 to the living and shining sun. By that, the sun's aging is promoted and it becomes a white dwarf. A normal white dwarf does not have light and nobody can locate it in the darkness of the universe. The white dwarf in which the space egg is sealed, transmits a fantastic beautiful light by the energy of the space egg. In the vast M33 galaxy, to search for the dwarf, one has only to find the source of electric wave which has extraordinary strong red shift.

Emperor Brone is well aware of this fact and he has finally caught the white

dwarf. Then with the Monopole in rank 5 which he has owned and secretly stored, he succeeds to speed up the self-rotating of the dwarf to 5times. The dwarf cannot endure the speed and explodes by itself. Then the vast gravity which did not allow the reach of others, now leaks outside then captain Brone can control his cruiser to the dwarf and extracts the space egg for himself. The huge battleship of Brone also stands for the controlling device of Monopole in rank 5.

Emperor Brone instantly thinks to activate the egg in any minutes. For that purpose, he completed the controlling device. The interior of the planet of the main star of Salene is actually the controlling device. That is, the gigantic device that one can only construct it with whole star.

#### Salene Side

From major Amesis who is in love with captain Rekyard and joins with him, an arrogance is gradually disappeared. She is affected by Rekyard's tender nature.

#### Earth Side

The attacking of Salene Army to Earth main is urged.

#### POINTS TO BE SOLVED AND NECESSARY IDEA

- The struggle of who reach the first at M33 galaxy(or to the star of ancient alien) -- and at the important star for the fighting tactics, the battle over the space egg, M10 should be taken place.
- The concept of M33 galaxy and the main star of ancient aliens.
- How to store the space egg and extract it.

#### The basic concept(Episode 7)

##### Location

Two ideas. M33 galaxy -- a. the drama is taking place in the residential spaceship.

b. the main star of Salene is coming to M33 galaxy.

What Emperor Brone is trying to realize is creating the superstrings with space egg M10. Here We omit the explanation of the superstrings but it is the gigantic energy even to produce the galaxy. That can be the ultra weapon which human beings have never able to creat. When one imagines that only one country possesses the nuclear weapon, it can be easily considered her relationship to the other countries.

To create it, he has to return to his main star which is also the controlling device but he fails it for the battle with Yamato. If he can bring Jupiter, it can be solved but it is impossible. (Or it is possible to bring Jupiter but it takes time) Then Emperor Brone tried to drive the space egg M10 with the monopole controlling device which is his own battleship. Many think it dangerous but Emperor is confident in his extraordinary technique as Monopole scientist.

Actually, the power of the space egg M10 is enormous and it surpasses the expectation of Emperor Brone. The stampede is taking place and the power becomes uncontrollable. If it continues, the universe which contains many planets should be destroyed. In the universe, the main star of Salene and Earth are contained. Then Emperor Brone dies in the state of insane from his despair. (To be considered)

Nabu and Yamato people try very hard to stop the stampede.

For that, they can fly away the fleet to the other universe. They cannot point out which universe but in other words it can be a sealing for the space egg. But the vast energy is necessary to do that. The wave cannon is too weak for that purpose. They can drive the monopole by the wave cannon to strengthen the power but it is still too weak to stop the stampede.

In the meantime, the information from the excavation of the ancient remains of Rococo star is finally interpreted. (Contents are under consideration)

With the information as a hint, Nabu is making a plan. That is to explode Monopole in rank 5 by the hands of Rekyard and Amesis. With the explosion energy, they could drive the energy of the wave cannon. Marcy calculate the course and they found out the accurate angle. However Yamato is not designed for that purpose. The explosion will surely damage Yamato and the power may kill all the passengers.

But Nabu dares to choose the way. Then Rekyard and Amesis start to explode the Monopole in rank 5 and Nabu launches the wave cannon. The ultra energy of Monopole in rank 5 drives the energy of wave cannon. Then stampede is taking place. Aboard space egg M10, the gigantic fleet of Emperor Brone is disappeared.

Yamato also suffers severe damage but no one is killed.

IDEA b
--------

Chasing after Emperor Brone, Salene arrives at the M33 galaxy again. (Same with idea a. until they own the space egg M10)

The residential fleet returns to the original position (such as north pole) and they drive the Monopole in rank 5. On the other hand, the Monopole in rank 10 drives from the entrance of controlling device of the planet style (such as south pole).

Then unexpected incident occurs. Rank 5 starts stampeding and becomes melting down. If they leave the situation, it will pass the planet core of the main star of Jupiter and unite with the rank 10 in the opposite end which will lead to the universal scale explosion.

After the death of Emperor Brone by madness, the story can be the same with the idea a.

The common solution
---------------------

Rekyard and Amesis are to be married in future and promise to build up Salene as a peaceful nation. Yamato is blessing them and heading for her longing place, her native land, the Earth.

Beautiful Earth is spreading in front of people. Nabu is deeply moved at the scene. But he cannot stay there to live a small life. Yamato launches again to seek for the endless dream and adventure in the vast universe.

Now, Nabu and boys are totally capable of controlling Yamato. Besides Nabu, Mercy is accompanying.

## Salene Side

Rekyard and Amesis are getting married but it is hardly considered that Amesis takes after her father position as the Empress with Rekyard's assistance. They would rather construct a democratic nation by ceasing the monarchic government.

## Earth Side

In the Earth Federation, they have the military force but it acts as the defence force and cannot attack from their side. Rather, it acts as the space police of the universal scale. So they welcome the new situation in Salene.

Yamato is included into the Earth Federation Army but later released after they concludes the situation with Salene. Schmidt and other crew officers are disembark the ship. The data of the former Yamato have been hand-overed to Earth Federation Army, Earth can construct Yamato by their own concept. Therefore, it is affirmed that the new battleship Yamato belongs to Nabu and his boys.

Then Nabu and his friends leave Earth. For controlling Yamato by themselves, they start to re-check the positioning the crew. Possibly, Nabu is assigned to be the captain.

### POINTS TO BE SOLVED AND NECESSARY IDEA

- Concepts of Yamato and Emperor's residential space fligate.
- Sealing of space egg-M10.
- Stampede of space-egg M10.
- The contents of informations blocked in the deta box of the former Yamato.
- How to read it out.
- How to stop the stampede of space egg-M10.
- How to seal the stampede.

## The basic concept

The space egg-M10 is only one Monopole in S pole, while other Monopoles are all in N pole therefore the connection of both poles lead to the complete destr-

uction of the universe.

## ANNEX

At the moment Brone convinces himself as the sole dictator of the universe, there awaits him an unexpected trap. The space egg which is about to increase its energy is becoming uncontrollable. If the situation continues, the explosion of small big-bang class should be occurred. Cause of the huge destruction of the galaxy lies in this explosion.

Emperor Brone start acting like mad guy and he is taken over by Yamato. Brone dies in the end.

Nabu and boys cannot find the way to stop the stampede of the space egg. But they know the information blocked in the data box of the former Yamato has something to do with the controlling of space egg-M10. Then they try to read out the information. To solve the mystery, the relationship of Nabu and his father scientist is the key. So the situation in which only Nabu can solve the problem should be desirable.

Nabu succeeded to read out the informations and by his life-risking act, they succeeded to stop the stampede of the space egg. Which is sealed again as it belongs to the field of God, and human being should never be able to handle.
